

Multiple Quantities and Multiple Page Counts in a Single Quote

Within a single Quote, you can enter an unlimited number of additional page counts (each with various paper stock and color configurations), which can be used in combination with multiple quantities, to generate multiple estimates. A complex pricing quote which used to take all day to generate can now be created in minutes! The reports generated from the multiple page counts and multiple quantities gives the customer a complete snapshot of the pricing for all requested scenarios. For Example: A customer requests a Quote for a 16, 24, or 32-page Tab with either Black Only or Spot Color on the additional pages, and wants prices for 10,000, 12,000, 15,000, 17,000 and 20,000 copies. The Presstimator will calculate each one of the configurations (including Markup) and provide the Multiple Pages pricing sheet along with the Customer Quote report. In this example, over **thirty** estimates are quickly and easily generated, and all are stored within a single Quote!

Job Information - 32,500 Copies

			Price per Quantity				
Pages	Price	Add'l M's	35,000	37,500	40,000	42,500	45,000
