

Total Usage Reports

The Presstimator includes a variety of Usage reports to detail all of the materials and time required to produce a set of selected jobs. From the Quote/Job History screen, you can apply multiple filters to select a set of Quotes/Jobs and then generate a report that totals the time and materials for that set of jobs. For example, you can create a Total Usage Report for a particular customer for a certain year, or for a selected plant over a month-long period. Charts are also created with the Total Usage data to display a graphical view of paper usage, paper waste, color ink usage and press impressions.

Totals			
		Dates: 10/1/2014 - 10/31/2014
